

## Welton Manor Winter Golf Information 2023/2024

We are encouraging members to return scores for handicapping throughout the year. This information has been compiled to assist members and visitors preparing for winter golf and the requirements to ensure relevant scores for handicap purposes can continue to be submitted. Please read the information board in the conservatory, before proceeding to the first tee, to check course conditions, competition information, temporary greens, winter tees and any restrictions etc. and ongoing maintenance work.

### 1. Preferred lies

We would like all members and visitors to be aware preferred lies will commence from 1<sup>st</sup> of October through to, at the latest, 30<sup>th</sup> April 2024 (to be revised Spring 2024). For scores to be acceptable for handicapping, the Local Rule may only allow the lie to be preferred on closely mown areas, fairways, and green fringes only, within 6” of the original lie of the ball. The Local Rule for marking, lifting, cleaning, and replacing on the same spot may be used anywhere within the General Area.

### 2. Mats (Tees and fairway mats)

Acceptable Scores may be returned in Competitions and in General Play when using fairway mats to protect the natural surfaces of the course, during the preferred lies period.

‘When a player’s ball lies in a part of the general area cut to fairway height or less and a putter is not being used for the stroke, the ball must be lifted, placed on and played from an Astroturf, or similar type, of mat. The mat must be placed as near as possible to where the ball originally lay, and the ball must be placed on the mat. The ball may be cleaned when lifted.’

### 3. Bunkers

Bunkers may be taken out of play and marked as GUR for situations such as severe or prolonged wet weather. Bunkers flooded with water can be marked as GUR; allowing scores to be still acceptable and returned for handicap purposes. There is no limit on the number of bunkers that can be taken 'out of play.'

### 4. Temporary greens

Please check the information board in the conservatory to check if any winter greens are in play.

For scores to be acceptable, no more than 2 temporary greens are allowed to be used. Whilst temporary greens are acceptable for handicapping purposes, whenever the length of the course length has been increased or decreased by more than 100 yards, the adjustments to the Course Rating and Slope Rating set out in Appendix G of the Rules of Handicapping must be applied.

### 5. Closed holes

During winter months there are various situations such as course conditions and maintenance plans where holes may be closed and declared out of play.

Their scores continue to be acceptable for handicap purposes – the golfer would follow rule 3.2 of the WHS Rules of Handicapping, 'When a Hole is Not Played', with the software calculating and awarding an adjusted gross score accordingly.

### 6. Trolleys/Buggies

Could we please ask our members and visitors to use hedgehog wheels or carry a light golf bag around the course to protect it during the Winter months, from 1<sup>st</sup> November 2023 to 31<sup>st</sup> March 2024. This will avoid a possible trolley ban. The use of heavy electric trolleys should be avoided as much as possible as they cause compaction and immense damage to the soil structure particularly in very wet areas.

Following our correspondence to members last winter, as of the 1<sup>st</sup> November 2023, we will be implementing a ban on electric trolleys that do not have hedgehog wheels throughout the Winter season. However, we are actively encouraging both our members and visitors to use hedgehog wheels on all golf trolleys wherever possible or use light golf bags or carry their bags for the Winter season. The use of golf buggies will be reviewed on a daily basis throughout the winter season. We prefer golfers who need a buggy to use our buggies unless their own buggies have appropriate floatation tyres, if you are unsure please ask at the golf reception. Please drive buggies sensibly around the course keeping well away from the greens and tees and avoiding any wet areas on the course. This will allow buggies to be used more throughout the winter months.

## 7. Course/Clubhouse preservation

Please repair all pitch marks on the greens and restore any divots on the tees and around the course. In addition, please refrain from walking with trolleys etc through wet areas on the course and avoid taking golf trolleys close to the greens and tees. We will be introducing some winter tee mats during the winter period whenever deemed necessary to do so.

We will endeavour to protect the main playing surface of the tees by either using the winter mats or different areas of the tees.

Please do not enter the golf reception/bar with muddy shoes. Please use the shoe cleaner outside adjacent to the conservatory door and clean them or change them for clean shoes before entering the golf reception/bar.

Also, please do not leave any litter out on the course.

### 8. Crow damage

Please be aware there maybe a few areas on the course where the crows may damage the turf. Please be patient throughout this period, we will endeavour to repair the damage wherever possible, by using a heavy roll etc and may have to, at times, deploy gas gun bird scarers around the course. We are sorry for any inconvenience, but we must try any means available to keep the damage to the minimum. We are fortunate that the grass normally recovers quickly in the spring once the weather warms up and the grass starts to grow again.

### 9. Tee set and yardage compliance

The Rules of Handicapping require that for a score to be acceptable for handicap purposes, it must have been played over a measured and officially rated tee set. The set of tees must be registered on the WHS platform by England Golf. Every golfer will be informed of the course conditions and tees for the day on arrival at the golf reception and directed to the information board in the conservatory.

Appendix G of the WHS Rules of Handicapping clarifies that the front of the teeing area should not be placed more than +/- 10 yards from the fixed measurement point on each tee. Overall length of the course is not to be +/- 100 yards from its measured length (from the fixed marker).

A 300 yards Rule provides for situations where there is a necessary shortening or lengthening of one of more holes by a total of more than 100 yards, but less than 300 yards: but only on a 'temporary' basis e.g. course excavation work/drainage etc. This 'Temporary Rating' would have to be submitted by us to be approved by England Golf.

This would permit 'acceptable scores' to continue to be returned. The maximum duration of approval is one year.

#### 10. Default Markers

Within the WHS portal, we as a club have the opportunity to switch on and off available tee sets. This functionality can stop scores being submitted in competitions and from general play at certain times of the year – for example to protect tees in the winter months or allow for course maintenance.

#### 11. Winter Handicaps

As WHS allows for the submission of scores from measured and rated tee sets throughout the year, any references to a 'Winter Handicap' is no longer acceptable (note: a player may only have one handicap).

#### 12. Annual Review

The annual WHS handicap index review process will be completed between 1<sup>st</sup> October and the end of December each year.

We hope the above information will help you to understand Winter golf rules and restrictions and allow you to continue enjoying your golf at Welton Manor, whilst helping to protect the course and maintaining your handicap etc. throughout the year. If you have any questions, please contact the management team ( Dave, Hayley or Jamie ) either via email; [info@weltonmanorgolfcentre.co.uk](mailto:info@weltonmanorgolfcentre.co.uk), by phone on 01673 861888, or at the golf reception.

Many thanks for your cooperation.  
*The Management Team*
